### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

## Step 1 — Battery

- Turn off the emergency switch located at the bottom right of the POWERbot.

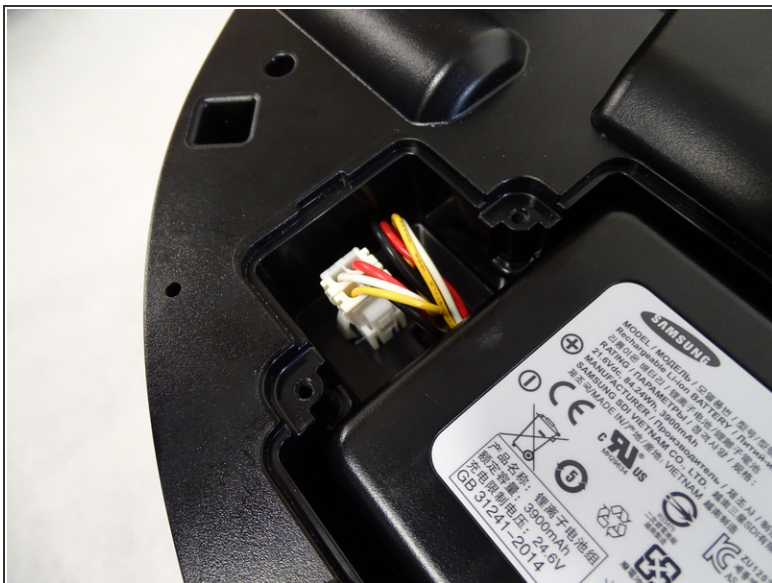

## Step 2

- Unscrew the two 6mm Phillips #1 screws and remove the lid, exposing the battery.

## Step 3

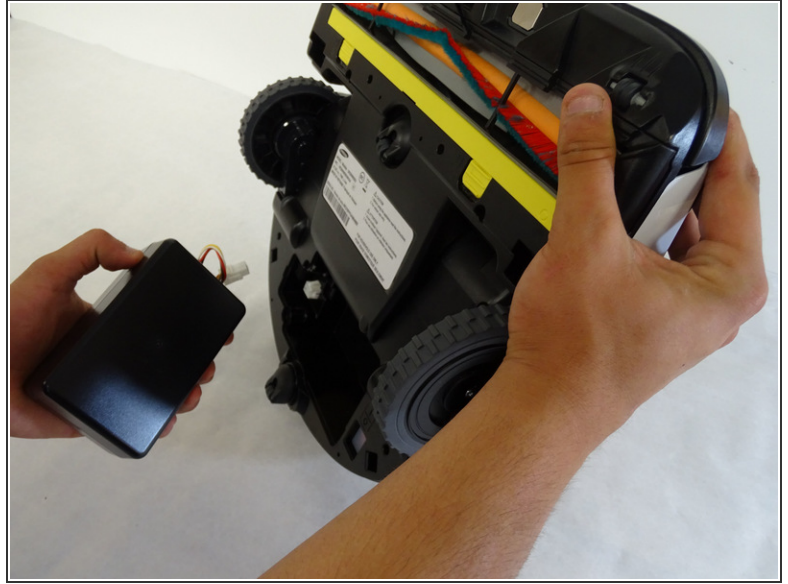

- Follow the wires and find the small white box next to the battery.
- On the side of the white box facing the battery, find the rigid tab.

## Step 4

- Push the tab inwards to the white box and pull the wires up. This will release the wires from the white box, allowing you to remove the battery.

## Step 5

- Remove the battery by holding the battery in place and partially righting the POWERbot so the battery falls out.

To reassemble your device, follow these instructions in reverse order.
